MCBC and several others have joined forces to bring the *Eyes Up* campaign to Ross Valley in response to preventable tragedies in which people have been killed by drivers who were distracted and/or driving under the influence. Our goal is to encourage people to keep their EYES UP and be mindful of other road users while driving, walking, and bicycling. [Eyes Up. Slow Down >>](#)

WHAT WE'RE READING

Copenhagen has taken bicycle commuting to a whole new level ([Los Angeles Times](#))

"It's like getting dressed or brushing your teeth in the morning. You get on your bike every day because it's there. So no one really ever asks themselves if it's better to bike or drive a car. Biking is what we do."

Study finds that e-bike riders get as much exercise as riders of regular bikes ([Treehugger](#))

A new study of people bicycling in seven European cities found that e-bikers take longer trips and ride more often than those pedaling without electric assist, leading to comparable physical activity levels between the two groups.
